## What Are Analytics and Business Intelligence Platforms?

Gartner defines analytics and business intelligence (ABI) platforms as those that enable organizations to model, analyze and visualize data to support informed decision making and value creation. These platforms facilitate the preparation of data, and the creation of interactive dashboards, reports and visualizations to uncover patterns, predict trends and optimize operations. By doing so, they empower users to collaborate and effectively communicate the dimensions and measures that drive their organization. These platforms may also optionally include the ability to create, modify or enrich a semantic model, including business rules.

ABI platforms integrate data from multiple sources, such as databases, spreadsheets, cloud services and external data feeds, to provide a unified view of data, breaking down silos and transforming raw data into meaningful insights. They also allow users to clean, transform and prepare data for analysis, in addition to creating data models that define relationships between different data entities.

### What Is Gartner Peer Insights "Voice of the Customer"?

*"Voice of the Customer" is a document that synthesizes Gartner Peer Insights reviews into insights for buyers of technology and services. This aggregated peer perspective, along with the individual detailed reviews, is complementary to Gartner expert research and can play a key role in your buying process. Peers are verified reviewers of a technology product or service, who not only rate the offering, but also provide valuable feedback to consider before making a purchase decision.*

Along with the historical peer-based perspective represented in this document, Gartner has a related expert-led Magic Quadrant for the analytics and business intelligence platforms market. For related research in this market, please visit the Magic Quadrant for Analytics and Business Intelligence Platforms.

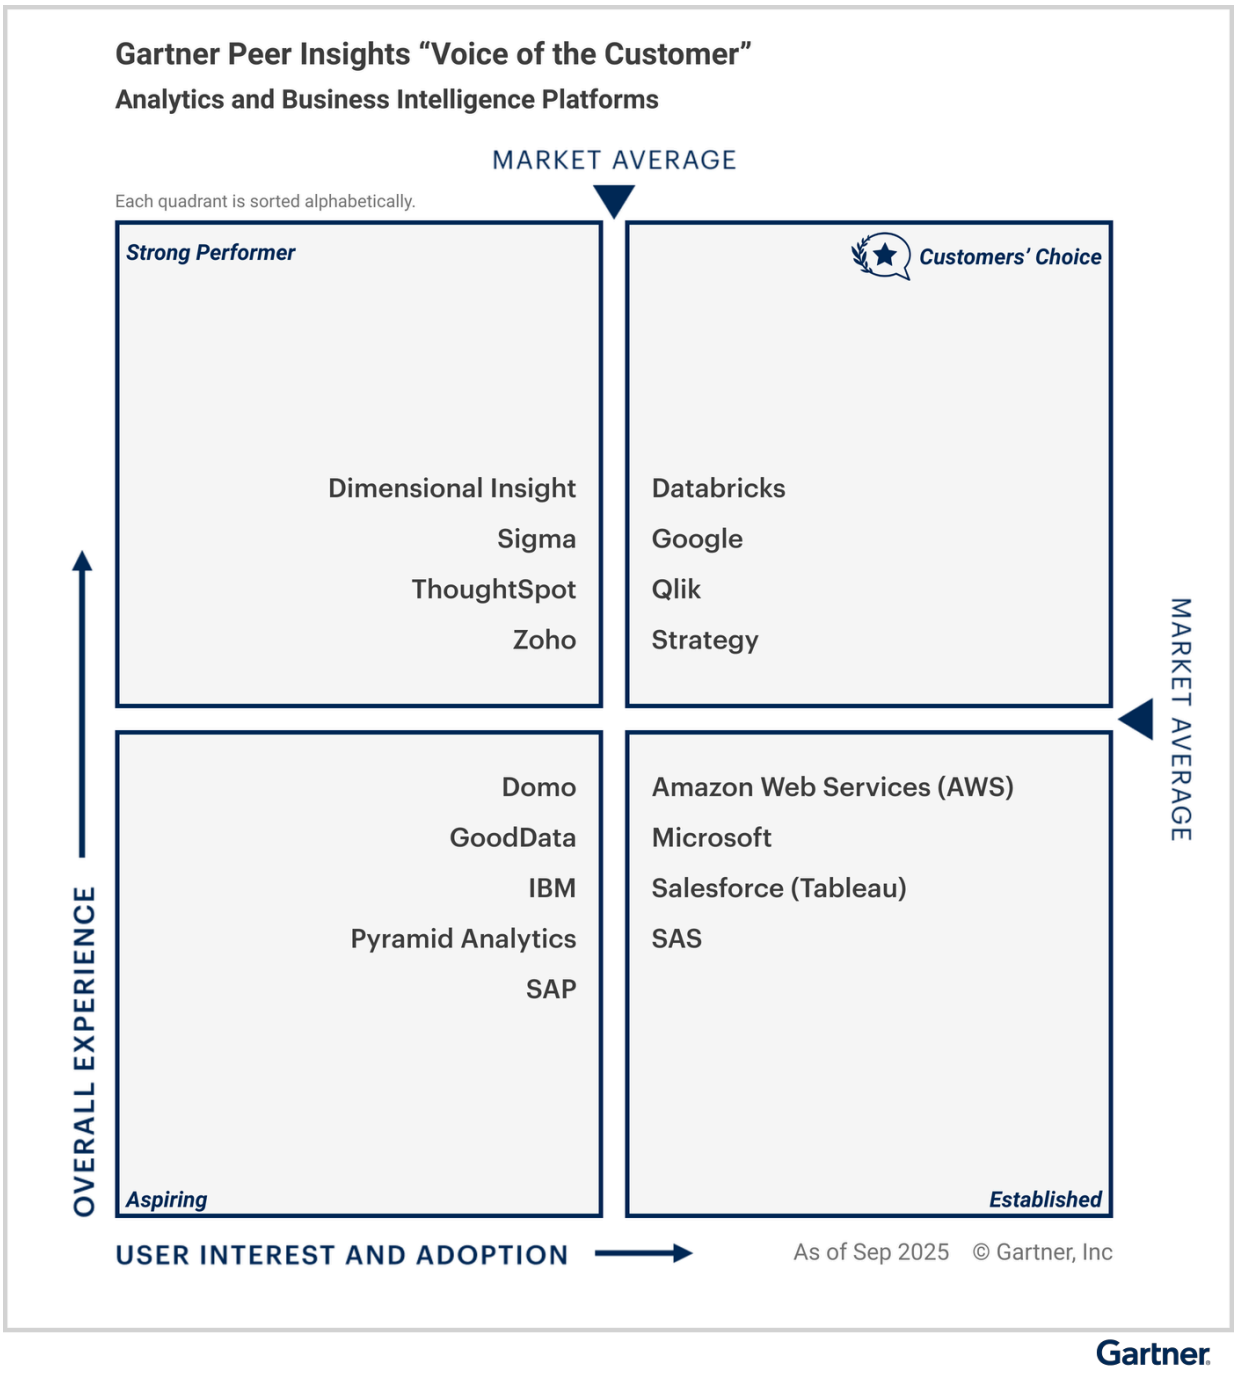

Figure 1 shows all "Voice of the Customer" eligible vendors in the market categorized into four quadrants based on scores assigned for User Interest and Adoption (x-axis), and Overall Experience (y-axis). The midpoint of each axis, labeled "market average," represents the average score as calculated exclusively from vendors included in the document.

Vendors' User Interest and Adoption (x-axis) scores incorporate three factors: review volume, user willingness to recommend, and review market coverage across industry, company size and region. Vendors' Overall Experience (y-axis) is a composite score that incorporates average user ratings for "Overall Experience," "Capabilities" and "Support/Delivery." See the Methodology section for more detail.

Figure 1. Voice of the Customer for Analytics and Business Intelligence Platforms

Source: Gartner (November 2025)

Vendors placed in the upper-right **"Customers' Choice"** quadrant of the "Voice of the Customer" have scores that meet or exceed the market average for both axes (User Interest and Adoption, and Overall Experience).

This research note is restricted to the personal use of .

Vendors placed in the lower-right **"Established"** quadrant have scores that meet or exceed the market average for User Interest and Adoption, but are below the market average for Overall Experience.

Vendors placed in the upper-left **"Strong Performer"** quadrant have scores that meet or exceed the market average for Overall Experience, but are below the market average for User Interest and Adoption.

Vendors placed in the lower-left **"Aspiring"** quadrant have scores below the market average for both User Interest and Adoption, and Overall Experience.

## Analytics and Business Intelligence Platforms Peer Reviews and Ratings

In addition to the synthesis provided by the "Voice of the Customer," you can read individual reviews and ratings on the Gartner Peer Insights page for this market.

The rest of this document highlights some key insights for the analytics and business intelligence platforms market based on 18 months of reviews and also points you to particular ways to use the site in your buying process.

Gartner Peer Insights' reviews give insight into end users' willingness to recommend each vendor. Willingness to recommend is a component of the "Voice of the Customer" x-axis. For details, see Gartner Peer Insights Voice of the Customer Methodology. Figure 2 compares vendors by the percent of reviewers who were willing to recommend them (see the Methodology section for details). To create a more detailed comparison between several vendors on your shortlist, please go to the Gartner Peer Insights page for this market and press the "Compare Alternatives" button under the vendor/product you are interested in.

## Vendor Summaries

Figures 3 through 19 summarize key information for each vendor included in the "Voice of the Customer":

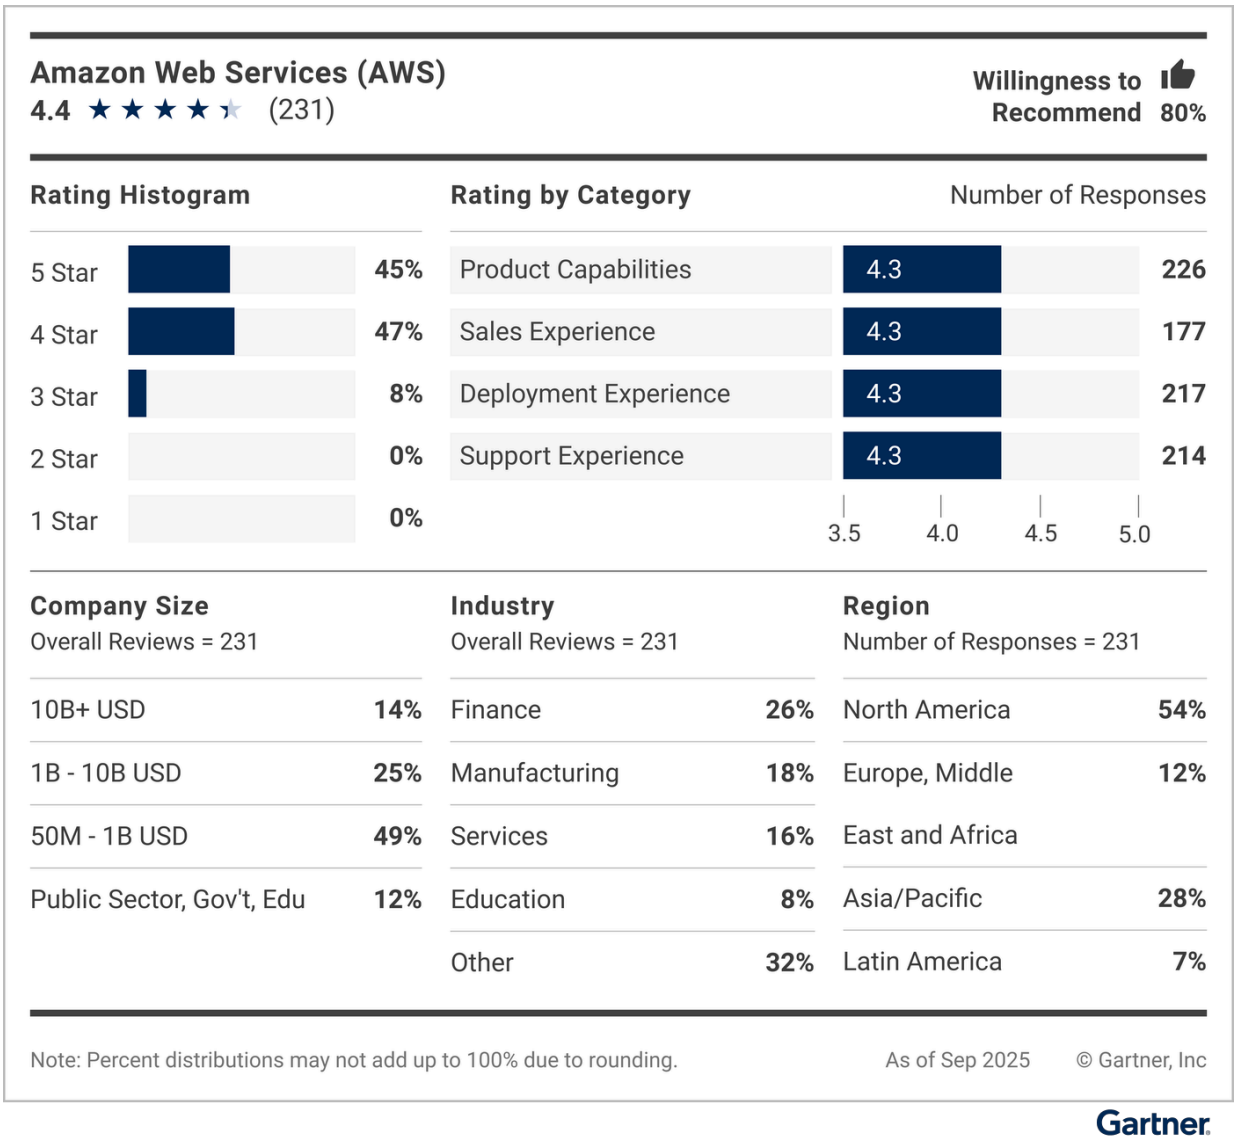

- Reviewer demographics for reviews received in the 18-month review period, ending 30 September 2025
- Overall Rating and rating distribution
- Other ratings covering specific aspects of the experience with the vendor

The same eligibility requirements and weighting used in the "Voice of the Customer" quadrants also apply for ratings in the vendor summary figures, including overall star rating, willingness to recommend and rating by category (see Gartner Peer Insights Voice of the Customer Methodology for details). Below each image is a direct link to the user reviews on the Peer Insights site.

## Methodology

A full description of the methodology can be found on the Gartner Peer Insights Voice of the Customer Methodology page.

Voice of the Customer includes vendors with products aligned to the market that have 20 or more eligible published reviews (and 15 or more ratings for “Capabilities” and “Support/Delivery”) during the 18-month consideration period ending 30 September 2025. Reviews from vendor partners or companies with less than $50 million in revenue are excluded.

This research note is restricted to the personal use of .

In the analytics and business intelligence platforms market, Gartner Peer Insights published 3,368 reviews and ratings during the consideration period. For details, see Gartner Peer Insights Voice of the Customer Methodology.

The data used in this report is drawn from reviews on Peer Insights, a free peer review and ratings platform that regularly publishes new reviews. The "Voice of the Customer" methodology uses a snapshot of reviews data from a defined timeframe and does not automatically update as new reviews are published. The external Peer Insights site will always have the most updated peer view of the vendors and products in this report.

The numerical ratings scores in each vendor summary graphic (shown as "Rating by Category") are best interpreted as sample statistics with a reasonable margin for error and not as exact values.
